

## **Measurement of thrombus formation ex vivo and in vivo**

Subcommittee: Biorheology

**Chairmen:** Johan Heemskerk, Peter Lenting, Mark Roest

### **Aim:**

To assess the commonly used in vitro and in vivo assays used by researchers in the field, identify best practices, and aspects in need of standardization.

### **Methodology:**

Survey distributed to research labs around the world. Survey results tabulated and co-authors and SSC subcommittee interpreted the results and determined recommendations.

**Year of starting:** 2010

### **Annual Report:**

In 2011 the in vivo survey results were published in JTH. Also, in 2011, a manuscript on the in vitro results were submitted to JTH for review. Results of the in vivo survey were presented at 2010 ISTH Congress. Results of the in vitro survey will be presented at the 2011 ISTH Congress.

**Year of completion:** 2011
